

Solar Enerji

Güneş enerjisi teknolojileri (Güneş Panelleri) güneş ışınlarını direk olarak toplayıp bu ışıklarda ısı veya elektrik üretimini sağlamaktadırlar.

Güneş enerjisi Türkiye gibi çok güneş alan ülkelerde önemli bir enerji alternatifidir. Bu teknoloji özellikle kırsal alanda şebeke dışı elektrik üretimi için çok kullanışlıdır. Bu teknolojinin tek dezavantajı gece üretim yapılamamasıdır.
