

A photograph of a dining room featuring a large, rustic wooden dining table with a prominent grain and a dark resin inlay. On the table sits a decorative, light-colored ceramic vase with a scalloped rim and a small finial. In the background, there are white chairs with green accents and a dark wooden cabinet. The lighting is warm and focused on the table.

# Our Wooden Dining Table Models

## Model 1

### *Technical specifications*

<b>Width</b>	<b>92cm</b>
<b>Length</b>	<b>242cm</b>
<b>Height</b>	<b>78cm</b>

## Model 2

### *Technical specifications*

<b>Width</b>	<b>110cm</b>
<b>Length</b>	<b>200cm</b>
<b>Height</b>	<b>76cm</b>

## **Model 3**

### *Technical specifications*

<b>Width</b>	<b>100cm</b>
<b>Length</b>	<b>213cm</b>
<b>Height</b>	<b>77cm</b>

## Model 4

### *Technical specifications*

<b>Width</b>	<b>90cm</b>
<b>Length</b>	<b>160cm</b>
<b>Height</b>	<b>78cm</b>

## **Model 5**

### *Technical specifications*

<b>Width</b>	<b>106cm</b>
<b>Length</b>	<b>211cm</b>
<b>Height</b>	<b>79cm</b>

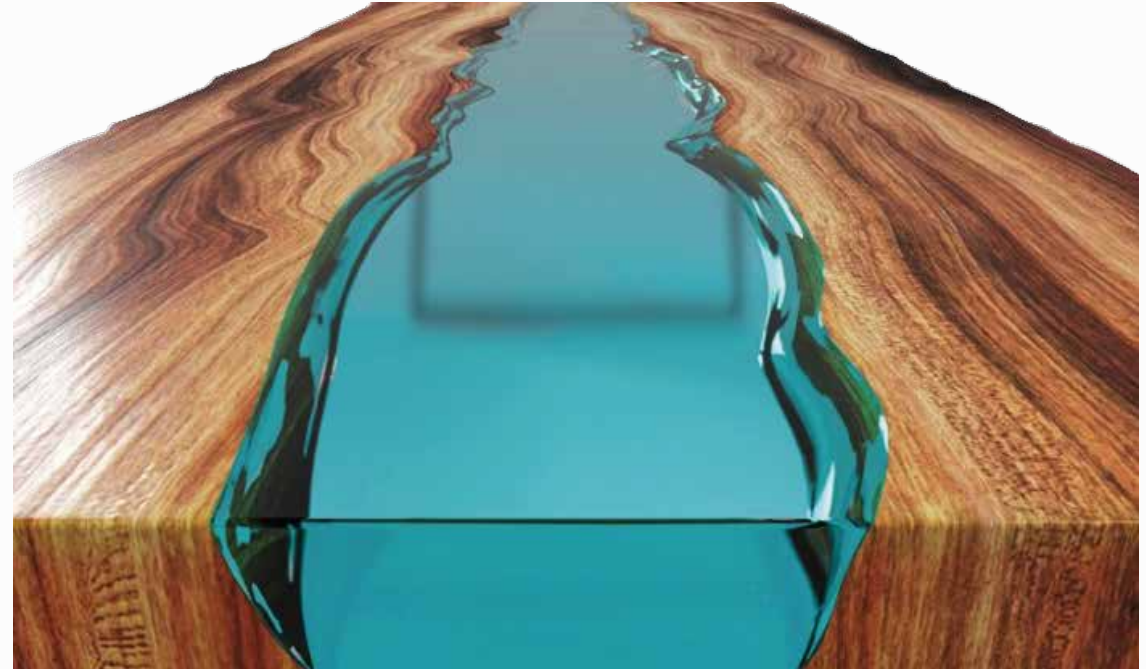

# Manufacture

Since our product model is a pure natural production, no mass production is carried out. Depending on the nature of the tree produced, the color of the surface may vary. In addition, epoxy is applied to the product.

## ***What is Epoxy Resin?***

Epoxy resin is a plastic that is known for its high adhesive strength and good chemical resistance. Because of this function, the areas of application are quite wide. Its resistance to water, alkalis and acids is very good. Used in many industrial applications for various purposes.

## *Why is epoxy resin preferred?*

Epoxy is a chemically very strong and durable adhesive. It is a chemical substance that, once dry, has a very hard structure and adheres firmly to the surface to which it is glued. With this strong structure, epoxy resin has a wide range of applications. Another reason why epoxy is preferred in many areas is that it dries quickly and sticks to the substrate. In this way, you get durable surfaces with epoxy resin in the shortest possible time. Especially when making tables with epoxy resin, it is possible to get aesthetic and durable tables by filling the cavities of walnut tables with colored or transparent epoxy resin.

## *What is epoxy in the middle?*

In the middle, epoxy resin is used to achieve a fantastic look with different colors, which is usually applied to the table with the aim of aesthetic use and ensures that two separate solid tables are firmly clamped together.

## *What is Mixed Epoxy?*

It is a work that is applied to obtain an aesthetic surface of cracks and gaps in the natural shape of mixed epoxy resin solid panels and to create a fantastic look with different colors.
